## CenturionSoft

CenturionSoft develops and markets software products designed for the consumer and business markets, focusing on security, data protection, and productivity. CenturionMail version 3.02 is the company's flagship product allowing secure email and file/folder protection using self-decrypting technology where the recipient needs nothing to open the encrypted email except the password. CenturionMail is a stand alone program which features include:

Plug-in to Microsoft Outlook, Password Manager, On-the-Fly file encryption, Shredder for securely deleting files, Time Bomb option and the ability to send encrypted emails in various formats. Perpetual user and site licenses sold to hospitals, banks, governments, DOD, law enforcement, insurance companies and many more. CenturionSoft is a Microsoft Certified ISV Software Solutions Partner and is a Software Abroad company
